EXPERIENCE

SIH Internal Hackathon
JANUARY 2020

- Created a sophisticated Crop Suggestion System for the farmers along with my team.
- Designed the front-end of our web-application along with login validation and Push-SMS service.

SRM Team Humanoid – *Team Manager*
JULY 2019 – PRESENT

- Manage day to day working of team properly and efficiently.
- Manage the funds allotted to the team.
- Contact companies for sponsorships.

HCL Infosystems, Noida – *Frontend Trainee*
JUNE 2019 – JULY 2019

- Designed and developed a website using ReactJS.
- Used Contentful CMS for storing the data.
- Later replaced the class components with the functional components using Hooks.

RECENT PROJECTS

Fitness Events App – (Ongoing)
PRESENT

- A MERN stack app.
- Add events with price money and participate in those events.
- Authorization using JWT.

Gatsby Blog – Live | Code
AUGUST 2020

- Progressive Web Application (works offline).
- Created using Gatsby, React, GraphQL and MDX.
- Code syntax highlighting using Prism React.
- Pagination using Gatsby-node createPages API.
- Mobile first approach.

Personal Portfolio Website – Live | Code
NOVEMBER 2019

- Designed and coded using Figma, ReactJS and Styled Components.
- Implemented Dark theme toggling functionality using Hooks and Theme Provider.

Pig Game – Code
AUGUST 2019

- Recreated this famous game to brush up my skills.
- Created using HTML5, CSS3 and JavaScript.

APIs
2019

- Created several Restful CRUD APIs to get familiar with Node and Express.
- Later implemented them with ReactJS and MongoDB to create a minimalistic full stack web app.

SRM Team Humanoid Website – Live | Code
OCTOBER 2018

- Created using HTML5, CSS3, jQuery and JavaScript.
- First ever project as a freelancer.
